**2024**

**AFP Provida S.A.**

# About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2024 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

## Disclaimers

### Legal Context

PRI recognises that the laws and regulations to which signatories are subject differ by jurisdiction. We do not seek or require any signatory to take an action that is not in compliance with applicable laws. All signatory responses should therefore be understood to be subject to and informed by the legal and regulatory context in which the signatory operates.

### Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

### Data accuracy

This document presents information reported directly by signatories in the 2024 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented. The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

## SENIOR LEADERSHIP STATEMENT

### SENIOR LEADERSHIP STATEMENT

SLS 1	CORE	N/A	N/A	PUBLIC	Senior Leadership Statement	GENERAL

#### Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

At ProVida we have a significant social role that involves managing the pension savings account of more than 3 million affiliates. As part of our fiduciary role, we realized that ESG factors are an important variable to consider when analyzing an investment opportunity and assessing its risk. Due to the materiality of environmental, social and governance (ESG) we decided to define Responsible Investment as a long-term perspective that allows us to evaluate the sustainability of companies and vehicles in which we invest, understood not only as a set of good practices but as a way of doing business that endures over time.

Our first big commitment was in 2019, when our Board of Directors signed the Principles of Responsible Investments, not only as a statement of our commitment in the importance of ESG factors but also as a lighthouse to guide our progress in incorporating ESG into our investment process.

Since then, we have been working on incorporating the ESG factors in our investment analysis, which have been evolving from a very high-level approach in just a few of our investment vehicles into a more robust and detailed investment process which includes ESG factors in every investment decision we make for almost every asset class we manage (with the exception of government bonds). Once an investment is made, stewardship becomes the main tool we have to promote good practices related to ESG factors across the investment vehicles in which we invest.

Since 2019, ProVida has continued to take internal and external commitments to responsible investment. For example, during 2023, the investment team committed to the board of directors to present an annual engagement plan each year and in 2024, ProVida signed, through Asociación de AFP, the new "Acuerdo Verde" which is an initiative of the Chilean government that promotes climate change practices across investors, the government and regulators of the Chilean financial market.

#### Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
  - refinement of ESG analysis and incorporation
  - stewardship activities with investees and/or with policymakers
  - collaborative engagements
  - attainment of responsible investment certifications and/or awards

In our last report we stated that “ProVida believes the Responsible Investment is a continuum effort”, for this reason, during the last 12 months, the investment team has been working on strengthening the external manager selection and monitoring process for fixed income and equities, adding new questions related to the voting process and policies, the prioritization of ESG factors, incorporation of systemic sustainability issues, among others. Additionally, a new ESG DDQ was implemented for the selection and monitoring of Alternative Asset managers. Before this implementation, ProVida had an ESG analysis selection process, that has been strengthened by this new DDQ, but did not monitor the ESG progress and commitments of alternative asset managers. This will change with the commitment to send the ESG DDQ annually to all the external managers (equities, fixed income and alternative asset).

In 2023, we also stated “We will keep on strengthening our Stewardship program”, which is one of ProVida’s key commitments, designed to promote good practices related to ESG factors across the investment vehicles in which we invest.

In relation to this commitment and as said in question SLS 1, ProVida presented an annually Engagement Program to the board of directors. Which in 2024 included the participation in a Collaborative Engagement with some other Latin American investors to promote the adoption of climate change initiatives across the region. First meetings with companies should be held during the third quarter 2024 and should continue through 2025.

In 2024, ProVida updated its Stewardship Policy, including an approach to conflicts of interest and further detailing its commitments to transparency. We understand the importance that transparency and disclosure of ESG related information has for the financial market and that is why continued deepen our transparency initiatives by quarterly publish the votes emitted in shareholders meetings, sending a letter to all local companies in which we hold more than 1% ownership to promote the correct and timely disclosure of ESG information and meeting with local companies to discuss the materiality matrix for their industry,

Finally, during this year, ProVida also reinforced the commitment to the “Acuerdo Verde”, which included two new commitments, related to transparency and disclosure, added to the 5 commitments already made.

### Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

We believe that Responsible Investment is a continuum effort, and we are planning on keep analyzing and evaluating our current Responsible Investment program to further strengthen it. To achieve this, our next steps are:

1. Continue deepening the fixed income ESG analysis.
2. Keep on our Stewardship initiatives, implementing 2024 program and preparing 2025 plan.
3. Continue promoting the internal and external disclosure of our Responsible Investment program through newsletters and a “Responsible Investment” section in ProVida’s website.

## ESG NOT INCORPORATED

Indicator	Type of indicator	Dependent on	Gateway to	Disclosure	Subsection	PRI Principle
OO 16	CORE	OO 11, OO 12–14	N/A	PUBLIC	ESG not incorporated	1

Describe why your organisation does not currently incorporate ESG factors into your investment decisions and/or in the selection, appointment and/or monitoring of external investment managers.

Internally managed

(E) Fixed income – SSA

We only invest in Chilean and US SSA, and most of our SSA assets are invested in Chile due to regulatory constraints. Given that these are economies that we know well and monitor frequently, we do not conduct a formal process to invest in these countries.

(H) Fixed income – private debt

We incorporate ESG factors in our investment decisions, but given that these are not liquid investments we have not incorporated these factors in the assets monitoring yet.

(O) Other

In our case Other includes derivatives only. We do not see how to do an ESG factor analysis for plain vanilla derivatives.
